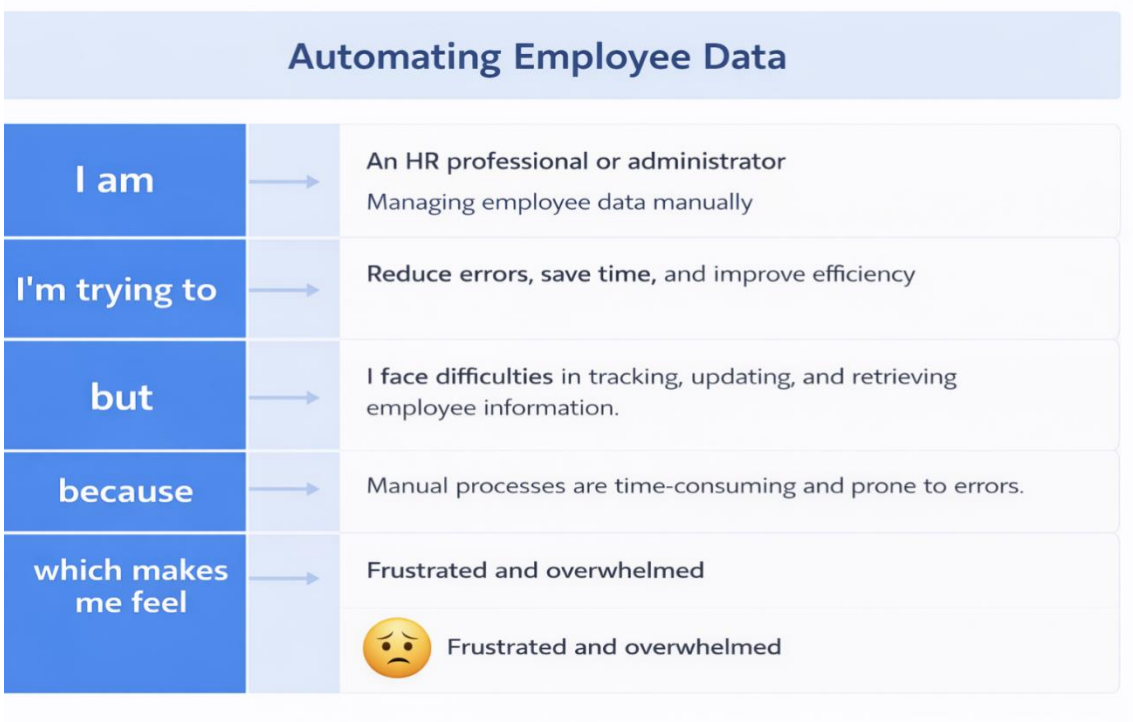
Team ID	SWTID-2026-5153
Project Name	Automating employee data
Maximum Marks	2 Marks

Customer Problem Statement

Managing employee data manually is time-consuming and prone to errors. Organizations often face difficulties in maintaining employee records, tracking attendance, handling payroll, and retrieving information quickly. Manual systems also lead to data duplication, lack of security, and reduced efficiency.

Therefore, there is a need for an automated employee data management system to improve accuracy, reduce manual work, and provide quick access to employee information, ultimately increasing organizational productivity.



Example:

Automating Employee Data

I am	I'm trying to	But	Because	Which makes me feel
an HR professional	manage employee data efficiently	the process is time-consuming and error-prone	data is handled manually with spreadsheets or paper	Frustrated
