Project Design Phase
Proposed Solution

Date	5 April 2026
Team ID	SWTID-2026-5153
Project Name	Automating Employee data
Maximum Marks	2 Marks

Proposed Solution:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Managing employee data manually is time-consuming and error-prone. HR teams face issues like duplicate records, data loss, and difficulty in tracking employee details such as department, manager, and contact information.
2.	Idea / Solution description	The project proposes an automated system to store, manage, and update employee data. Data will be imported using files (Excel/XML) into a centralized platform (like ServiceNow), where it can be easily accessed, updated, and maintained with accuracy.
3.	Novelty / Uniqueness	Reduces manual work using automation Uses import sets for quick data upload Centralized system for easy access Minimizes human errors
4.	Social Impact / Customer Satisfaction	Saves time for HR employees Improves data accuracy and reliability Provides faster access to employee information Enhances employee management experience
5.	Business Model (Revenue Model)	Can be offered as a software service (SaaS) to companies Subscription-based model for organizations Paid customization and support services
6.	Scalability of the Solution	Can handle large employee databases Easily expandable to include payroll, attendance, and performance tracking Suitable for small, medium, and large organizations
