Project Design Phase
Solution Architecture

Date	5 April 2026
Team ID	SWTID-2026-5153
Project Name	Automating employee data
Maximum Marks	4 Marks

Solution Architecture:

The solution architecture for automating employee data uses a layered system with a user interface, business logic, and a centralized database to manage and process employee information efficiently.It ensures secure, scalable, and automated handling of data, reducing manual effort while improving accuracy and overall organizational performance.
